Capellen, 1 December 2021

SUBJECT: Night Vision Surveillance Equipment (NVSE) Conference/Industry Day.

Dear Ladies and Gentlemen,

I am pleased to announce that NSPA is organizing the 9th NVSE Conference/Industry Day from **24 to 26 May 2022 in Athens** sponsored by NSPO Night Vision and Optoelectronics Support Partnership and hosted by Greece.

This event shall bring together military and NSPA specialists with **NATO NVSE manufacturers of latest generation equipment** to exchange operational, technical and logistics information on their support and acquisition, particularly for day&night target detection, observation, reconnaissance and identification, including fire control systems and smart shooter applications. This scope includes both portable solutions as well as those installed on remote stations and integrated in C2 systems.

The schedule will provide for a succinct presentation to NSPA and national representatives by attending companies on their respective products/technologies over the first two days, together with the possibility on the third of displaying the equipment at a military facility with the option of long range observation.

Please communicate your suggestions and/or your interest to participate by email to pp@nspa.nato.int no later than **6 January 2022**, together with the key details of the equipment/technology to be presented/displayed. The agenda and administrative details will be released shortly thereafter to the interested companies within the targeted industry.

I look forward to your participation in what promises to be an exceptional event.

Sincerely,

Patrick FESQUET
Director of Procurement
